

RECYCLED SOCKS!

A better carbon footprint

GoodSocks

GoodSocks are 50% recycled cotton, 45% recycled PET and 5% elastane. The cotton is made from cutting losses during textile production. From these losses new threads are spun. During this process there is no usage of bleach, paint or other chemicals. The process is a 100% natural and therefore we save approximately 1.000 liter water per pair of socks, which is normally used to produce colour and process cotton. The socks meet the Deko-tex standard 100 certified and are made in Europe. The cotton is combined with recycled PET and elastane to make a comfortable and durable pair of socks.

The benefits:

'A better carbon footprint'

- 50% recycled cotton, 45% recycled PET, 5% elastane
- 0% paint, bleach, other chemicals
- Eeko-tex standard 100 certified
- GRS certified
- 1.000 liter water saved per pair of socks
- 5% of the profit donated to the Plastic Soup Foundation
- Made in Europe

PRODUCT SPECIFICATIONS

Article number:	A127-GSEU
Minimum order quantity:	500 pieces
2 sizes available:	36/40 and 41/45
Packing details:	250 pieces in a carton

Many standard stock colours available
Custom design with 2 to 6 colours.
Including custom made kraft headercard
Delivery time 4-6 weeks after approval
